About me

I have worked in operations for most of my career, mostly on the railway. For almost four years I controlled rail traffic at Trafikverket, and since May 2026 I've worked as a Chief Track Work Supervisor, leading track work projects on the railway.

I'm used to safety-critical work with strict rules, and to handling problems quickly and calmly when something goes wrong. I like finding more efficient ways to work. At my current job I built tools in Excel that my team uses every day.

Work experience

Chief Track Work Supervisor (Huvudtillsyningsman)
LD Järnväg & Planering AB
May 2026 – present · Malmö

- Oversee several railway projects running at the same time
- Plan the projects and worksites together with Trafikverket, which owns the railway
- Lead and coordinate traffic safety for work in or near the track under D-skydd, including A-, E-, L- and S-skydd, with risk assessments according to TTJ
- Keep contact with train dispatchers and traffic control
- Responsible for logbooks, start permits and handing the track back in a condition trains can run on
- Built Excel tools with VBA macros for tracking and safety documentation. A team of 6 uses them daily across 5 projects, and they save 2–4 work hours per day

Train Traffic Controller and TLS Programmer
Trafikverket
Sep 2022 – May 2026 · Malmö

- Controlled rail traffic in the 24/7 traffic control centre, including trains, shunting and track inspection runs
- Handled accidents, near misses and other disruptions
- Coordinated emergency stops when the police, fire service or ambulance needed the line stopped
- Worked in TLS every day, and after one year joined the team of three that programmed it

Customer Service and Invoicing
Postnord (employed through Randstad the first 6 months)
Oct 2020 – Sep 2022 · Malmö

- Handled invoice disputes, credit notes and payouts
- Became Salesforce superuser after one year and helped improve how the team used it
- Import and export control in Citrix NCM

Earlier roles

IT Support and Customer Service, Bredband2 Jun – Sep 2020 · Malmö
Troubleshooting for broadband, routers, telephony and antivirus

Machine Operator, Metso Sep 2018 – Sep 2019 · Trelleborg
Machine operation and quality control in mineral processing production

Skills

TLS, TTJ and track protection (D-skydd)

Excel and VBA macros

Salesforce (superuser), SAP, Citrix NCM, Microsoft Office

AI tools (Claude, ChatGPT), basic JavaScript and Git

Languages

Swedish	Native
English	Fluent
Danish	Good
Norwegian	Good
German	Basic

Projects

In my free time I build small web apps with AI coding tools.

Rail Pulse: a dashboard of train punctuality, delays and their causes, built on Trafikverket's open data

TokenWise AI: a website that explains to companies what AI costs and what it can do
tokenwise-ai.vercel.app

Education

IT – Networking and Media
Sundsgymnasiet
2014 – 2018 · Vellinge

Interests

I travel whenever I get the chance, and I always try to find somewhere to surf. At home I play football with friends, and I'm trying to become a better cook.
