About me

I have worked in operations for most of my career, mostly on the railway. For almost four years I controlled rail traffic at Trafikverket, and since May 2026 I've worked as a Chief Track Work Supervisor, leading track work projects on the railway.

In my current job I lead safety on railway worksites, often on several projects at the same time, and plan each one with Trafikverket. I'm used to safety-critical work with strict rules, and to solving problems calmly when plans change. I like finding more efficient ways to work.

Key skills: Project planning · Project coordination · Stakeholder communication · Risk assessment · Safety compliance · Process improvement · Rail infrastructure · Excel/VBA · Salesforce · SAP

Work experience

Chief Track Work Supervisor (Huvudtillsyningsman)
LD Järnväg & Planering AB
May 2026 – present · Malmö

- Lead safety on railway worksites from planning to hand-back, often on several projects at the same time
- Plan each project with Trafikverket (Swedish Transport Administration) and coordinate all the protection on the track
- Keep traffic control updated until the track is ready for trains again
- Cut the paperwork with Excel and VBA tools I built, which save a team of 6 people 2–4 hours a day

Train Traffic Controller
Trafikverket
Sep 2022 – May 2026 · Malmö

- Controlled trains, shunting and track inspection runs through remote signalling systems in the 24/7 control centre, working shifts around the clock
- Handled accidents, technical faults and other disruptions by rerouting trains, changing timetables or stopping traffic, together with the police, fire service or ambulance when needed
- Constant contact with train drivers, other traffic controllers and passenger information
- Part of the team that programmed the train automation system

Customer Service and Invoicing
Postnord (employed through Randstad the first 6 months)
Oct 2020 – Sep 2022 · Malmö

- Handled invoice disputes, credit notes and payouts
- Became Salesforce superuser after one year and helped improve how the team used it
- Import and export control in Citrix NCM

Earlier roles

IT Support and Customer Service, Bredband2 Jun – Sep 2020 · Malmö
Troubleshooting for broadband, routers, telephony and antivirus

Machine Operator, Metso Sep 2018 – Sep 2019 · Trelleborg
Machine operation and quality control in mineral processing production

Skills

- Project and worksite planning
- Coordination with Trafikverket and traffic control
- Risk assessment and track protection (TTJ)
- Excel, VBA, Salesforce, SAP, Microsoft Office

Swedish	Native
English	Fluent
Danish	Good
Norwegian	Good
German	Basic

Projects

In my free time I build small web apps with AI coding tools.

Rail Pulse: a dashboard of train punctuality, delays and their causes, built on Trafikverket's open data

TokenWise AI: a website that explains to companies what AI costs and what it can do
tokenwise-ai.vercel.app

Education

IT – Networking and Media
Sundsgymnasiet
2014 – 2018 · Vellinge

Interests

I travel whenever I get the chance, and I always try to find somewhere to surf. At home I play football with friends, and I'm trying to become a better cook.
