About me

I have worked in operations for most of my career, mostly on the railway, and I started out in IT support. For almost four years I controlled rail traffic at Trafikverket and was part of the team that programmed its train automation system. Since May 2026 I've worked as a Chief Track Work Supervisor, leading track work projects on the railway.

I like finding more efficient ways to work. At my current job I built tools in Excel and VBA that my team uses every day, and in my free time I build web apps with AI coding tools.

Key skills: Process improvement · Automation · Excel/VBA · Incident management · 24/7 operations · Salesforce · SAP · Microsoft Office · IT support · Railway operations

Work experience

Chief Track Work Supervisor (Huvudtillsyningsman)
LD Järnväg & Planering AB
May 2026 – present · Malmö

- Cut the paperwork with Excel and VBA tools I built, which save a team of 6 people 2–4 hours a day
- Lead safety on railway worksites from planning to hand-back, often on several projects at the same time
- Plan each project with Trafikverket (Swedish Transport Administration) and coordinate all the protection on the track
- Keep traffic control updated until the track is ready for trains again

Train Traffic Controller
Trafikverket
Sep 2022 – May 2026 · Malmö

- Part of the team that programmed the train automation system
- Controlled trains, shunting and track inspection runs through remote signalling systems in the 24/7 control centre, working shifts around the clock
- Handled accidents, technical faults and other disruptions by rerouting trains, changing timetables or stopping traffic, together with the police, fire service or ambulance when needed

Customer Service and Invoicing
Postnord (employed through Randstad the first 6 months)
Oct 2020 – Sep 2022 · Malmö

- Handled invoice disputes, credit notes and payouts
- Became Salesforce superuser after one year and helped improve how the team used it
- Import and export control in Citrix NCM

Earlier roles

IT Support and Customer Service, Bredband2 Jun – Sep 2020 · Malmö
Troubleshooting for broadband, routers, telephony and antivirus

Machine Operator, Metso Sep 2018 – Sep 2019 · Trelleborg
Machine operation and quality control in mineral processing production

Skills

- Excel and VBA macros
- AI coding tools: Claude Code, ChatGPT
- JavaScript, React, Git (learning)
- Salesforce (superuser), SAP, Citrix NCM

Languages

Swedish	Native
English	Fluent
Danish	Good
Norwegian	Good
German	Basic

Projects

TokenWise AI: a website that explains to companies what AI costs and what it can do
tokenwise-ai.vercel.app

Rail Pulse: a dashboard of train punctuality, delays and their causes, built on Trafikverket's open data

Education

Full-stack web development
The Odin Project (self-study)
2026 – ongoing

IT – Networking and Media
Sundsgymnasiet
2014 – 2018 · Vellinge

Interests

I travel whenever I get the chance, and I always try to find somewhere to surf. At home I play football with friends, and I'm trying to become a better cook.
