PROFILE

Railway professional with 4+ years in safety-critical rail operations, from real-time train traffic control and programming in Trafikverket's operational traffic control system (TLS) to leading railway track-work projects for the infrastructure owner. Experienced in project planning, risk management, incident handling and coordinating multiple teams and stakeholders in a 24/7 environment where operational safety and security are non-negotiable. Combines hands-on knowledge of railway operational technology (OT) with an IT background and AI-assisted automation. Fluent in English and available after a two-month notice period.

CORE COMPETENCIES

- Project planning and coordination
- Client and stakeholder contact
- Risk assessment and safety work
- Railway operations and systems (TLS, TTJ)
- Incident handling
- Process improvement and automation

WORK EXPERIENCE

May 2026 – Present | Malmö, Sweden

Chief Track Work Supervisor (Huvudtillsyningsman, HTSM) | LD Järnväg och planering AB

Overall responsibility for traffic safety, electrical safety and the work environment during track work. Plan, coordinate and risk-assess railway projects on the live rail network on behalf of the infrastructure owner.

- Lead and coordinate several on-site teams across parallel projects
- Main point of contact with the client (railway infrastructure owner)
- Planning of upcoming projects – scope, resources, logistics and timelines
- Risk assessment and protection measures (A-, E-, L- and S-skydd) under TTJ
- Built Excel/VBA tools with AI assistance that the team now uses in daily planning

---

September 2022 – May 2026 | Malmö, Sweden

Train Traffic Controller / TLS Programmer | Trafikverket (Swedish Transport Administration)

Real-time traffic control in Trafikverket's 24/7 traffic control centre.

- Traffic control of trains, shunting and movements within track possessions
- Operation and programming in TLS, the traffic control system for live train movements
- Handling of incidents, near misses and deviations, including coordination with emergency services
- Traffic stops at the request of police, rescue services and ambulance
- Work in accordance with TTJ and strict routines for sensitive information

More information about my role at Trafikverket can be provided at interview

---

October 2020 – September 2022 | Malmö, Sweden

Customer Service & Invoicing Specialist (via Randstad) | Postnord

- Salesforce superuser – involved in developing and improving the Salesforce environment
- Import/export control in the Citrix NCM customs system
- Invoice disputes, credit notes, payouts and incident management
- Powers of attorney for companies and private individuals

June 2020 – September 2020 | Malmö, Sweden

IT Support & Customer Service | **Bredband2**

- Technical support and troubleshooting for broadband, routers, mobile broadband, telephony and antivirus
- Sales and customer service

September 2018 – September 2019 | Trelleborg, Sweden

Machine Operator | **Metso Minerals Sweden AB**

- Production within mineral processing technology – machine operation, risk assessment and quality control

AI & AUTOMATION

2026

Workflow automation | **LD Järnväg och planering AB**

- Excel tools and VBA macros built with AI assistance, used daily by a team of 6 across 5 projects
- Saves roughly 2–4 work hours per day and automates parts of the safety documentation

---

2026

VoiceReader | **Personal project**
