About me

I have worked in operations for most of my career, mostly on the railway. For almost four years I controlled rail traffic at Trafikverket, and since May 2026 I've worked as a Chief Track Work Supervisor, leading track work projects on the railway.

I'm used to safety-critical work with strict rules, and to handling problems quickly and calmly when something goes wrong. I like finding more efficient ways to work. At my current job I built tools in Excel that my team uses every day.

Work experience

Chief Track Work Supervisor (Huvudtillsyningsman)
LD Järnväg & Planering AB
May 2026 – present · Malmö

- Plan railway projects and worksites together with Trafikverket (Swedish Transport Administration), with several running at the same time
- Lead and coordinate traffic safety in and near the track under D-skydd, the level that covers A-, E-, L- and S-skydd, with risk assessments according to TTJ
- Keep in contact with train dispatchers and traffic control while the work is on
- Responsible for logbooks, start permits and handing the track back ready for trains
- Built Excel and VBA tools for tracking and safety documentation that save 2–4 work hours per day. A team of 6 uses them daily across 5 projects

Train Traffic Controller
Trafikverket
Sep 2022 – May 2026 · Malmö

- Controlled trains, shunting and track inspection runs through remote signalling systems in the 24/7 control centre, working shifts around the clock
- Handled accidents, technical faults and other disruptions by rerouting trains, changing timetables or stopping traffic, together with the police, fire service or ambulance when needed
- Constant contact with train drivers, other traffic controllers and passenger information
- Part of the team that programmed the train automation system

Customer Service and Invoicing
Postnord (employed through Randstad the first 6 months)
Oct 2020 – Sep 2022 · Malmö

- Handled invoice disputes, credit notes and payouts
- Became Salesforce superuser after one year and helped improve how the team used it
- Import and export control in Citrix NCM

Earlier roles

IT Support and Customer Service, Bredband2 Jun – Sep 2020 · Malmö
Troubleshooting for broadband, routers, telephony and antivirus

Machine Operator, Metso Sep 2018 – Sep 2019 · Trelleborg
Machine operation and quality control in mineral processing production

Skills

Train control systems, TTJ and track protection (D-skydd)

Excel and VBA macros

Salesforce (superuser), SAP, Citrix NCM, Microsoft Office

AI tools (Claude, ChatGPT), basic JavaScript and Git

Languages

Swedish	Native
English	Fluent
Danish	Good
Norwegian	Good
German	Basic

Projects

In my free time I build small web apps with AI coding tools.

Rail Pulse: a dashboard of train punctuality, delays and their causes, built on Trafikverket's open data

TokenWise AI: a website that explains to companies what AI costs and what it can do
tokenwise-ai.vercel.app

Education

IT – Networking and Media
Sundsgymnasiet
2014 – 2018 · Vellinge

Interests

I travel whenever I get the chance, and I always try to find somewhere to surf. At home I play football with friends, and I'm trying to become a better cook.
