About me

I have worked in operations for most of my career, mostly on the railway, and I started out in IT support. For almost four years I controlled rail traffic at Trafikverket and programmed in its traffic control system, TLS. Since May 2026 I've worked as a Chief Track Work Supervisor, leading track work projects on the railway.

I like finding more efficient ways to work. At my current job I built tools in Excel and VBA that my team uses every day, and in my free time I build web apps with AI coding tools.

Work experience

Chief Track Work Supervisor (Huvudtillsyningsman)
LD Järnväg & Planering AB
May 2026 – present · Malmö

- Built Excel tools with VBA macros for tracking and safety documentation. A team of 6 uses them daily across 5 projects, and they save 2–4 work hours per day
- Manage several teams on the ground across parallel railway projects
- Contact person between the teams and the customer who owns the railway
- Plan upcoming projects: staffing, equipment, logistics and timelines
- Responsible for traffic safety, electrical safety and the work environment on site

Train Traffic Controller and TLS Programmer
Trafikverket
Sep 2022 – May 2026 · Malmö

- Worked in TLS every day, and after one year joined the team of three that programmed it
- Controlled rail traffic in the 24/7 traffic control centre, including trains, shunting and track inspection runs
- Handled accidents, near misses and other disruptions, including emergency stops for the police, fire service or ambulance

Customer Service and Invoicing
Postnord (employed through Randstad the first 6 months)
Oct 2020 – Sep 2022 · Malmö

- Handled invoice disputes, credit notes and payouts
- Became Salesforce superuser after one year and helped improve how the team used it
- Import and export control in Citrix NCM

IT Support and Customer Service
Bredband2
Jun 2020 – Sep 2020 · Malmö

- Troubleshooting for broadband, routers, telephony and antivirus
- IT advice to private customers by phone

Earlier roles

Machine Operator, Metso Sep 2018 – Sep 2019 · Trelleborg
Machine operation and quality control in mineral processing production

Skills

- Excel and VBA macros
- AI coding tools: Claude Code, ChatGPT
- JavaScript, React, Git (learning)
- Salesforce (superuser), SAP, Citrix NCM, TLS

Languages

Swedish	Native
English	Fluent
Danish	Good
Norwegian	Good
German	Basic

Projects

TokenWise AI: a website that explains to companies what AI costs and what it can do
tokenwise-ai.vercel.app

Rail Pulse: a dashboard of train punctuality, delays and their causes, built on Trafikverket's open data

Education

Full-stack web development
The Odin Project (self-study)
2026 – ongoing

IT – Networking and Media
Sundsgymnasiet
2014 – 2018 · Vellinge

Interests

I travel whenever I get the chance, and I always try to find somewhere to surf. At home I play football with friends, and I'm trying to become a better cook.
